Maintenance & Cleaning

Above and below ground

(VCA** / ISO 9001)

Preventative maintenance & cleaning + repair to damaged collection systems above and below ground with a volume of 25 to 5000 litres

MORE! B.V. is specialised in the complete maintenance and cleaning of your collection systems above and below ground. Annual maintenance and cleaning not only lengthen the systems' durability, but safety is better assured.

MORE! B.V. is therefore certified in accordance with the VCA** and ISO 9001. (VCA is the industry checklist for Health, Safety and the Environment in the Netherlands)

Maintenance and cleaning operations are recorded digitally in a specially developed website application.

With this application you have direct access to the results of operations that have been carried out.

You can also use this application to report and register damage online.

The registered operations can be processed into management reports.
